EDUCATION

University of Texas at Austin - Austin, TX
B.S.A Biochemistry with a minor in Psychology, Spring 2019

Elements of Computing Certificate, Fall 2017 - Spring 2019
- 6 courses in disciplines including software engineering/design, databases, and web programming

McCombs School of Business, Health Technology & Health IT Certificate, Summer 2019
- 9-week program with coursework including: Project Management, Process Redesign and Quality Improvement; and Technology Competencies

WORK EXPERIENCE

Soluta Health   *Austin, TX*
Software Engineer (August 2019- Current)
- Maintained multiple C# ASP.NET MVC client/server applications by developing data-driven, client-specific features in JavaScript/jQuery, troubleshooting bugs through the full-stack, writing performance-tuned SQL stored procedures, and providing technical documentation
- Worked with several client representatives of varying technical background to break down card requirements into modular, easy to test components for each agile sprint

Nourish Ventures   *Austin, TX*
Software Engineer Intern (February 2019- June 2019)
- Transitioned legacy code from Python2 to Python3 Django framework as well as designing and implementing single page application using React.js

TECHINCAL PROJECTS

Fish Dreams – Life Sci Hackathon Winner 2019   *Austin, TX*
Software Developer (January 2019- ongoing)
- Involved in creation phase of a healthcare application that measures mild cognitive impairment
- Designed UI with special consideration of HIPAA standards

AustinMusicians.me   *Austin, TX*
Full Stack Developer (January 2019-June 2019)
- Worked with student development team creating a dynamic website application hosted on Google Cloud Platform and implemented CI/CD and version control using Git.
- Coded front-end using modified Bootstrap4/CSS and created dynamic back-end using Flask
- Created normalized relational database from raw data
